## **Beauty Tips and Advice for your Wedding Day**

For best results wash your hair the night before. When hair is damp, please add as much mousse possible. Do Not be Afraid. Mousse has come a long way and hair will hold curl much better.

If the weather is going to be very humid, it is much better to work with your current hair texture is.

Do not dye your hair a dramatically different colour or cut it right before your big day in case you don't like it – you won't feel like you.

Do not wax the day before your wedding day. Redness and irritation may prevail. Wait at least 48 hours.

Do not get microdermabrasion or a major facial the day before your wedding day. Wait at least 72 hours.

Do not go for a deep spray tan unless you have done so before. If going for a spray tan make sure to exfoliate and moisturize beforehand. A trial is a good idea as well.
